

Versatile and fast

Put together your own custom behind-the-counter and over-the-counter/self service range in just a few clicks.

Our software enables you to create digital posters and offers. Make sure you always have the right content on display with a freely adjustable timing control. For instance, this can be adapted to your daily business hours and perfectly tailored to customers.

Thanks to a direct link to your ERP system, the screens always show the current prices. You can decide whether to dispense goods via our touch screens, set them to display the current weather or to display the emergency service for your customers.

INDIVIDUAL OFFER

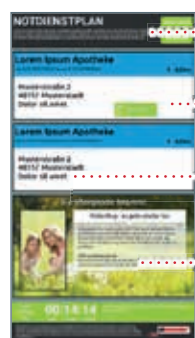

- Background freely configurable
- More than 60,000 product photos
- Customisable price display
- Animated effects for product, price and text
- Own information text optional

VISUAL BEHIND-THE-COUNTER

- 12 or 9 products with image or video in frame
- Products can be stacked automatically

Digital Solutions

APOSTORE

Successful digitalisation for the future of your pharmacy

Our solutions at a glance

TABLET
Personal and discrete consultancy completely independent of location.

PICKING ROBOT
More time and space for growth with picking machines from Apostore.

ACTIVESHELF
Thanks to a combination of digital information and tactile experience it can assist in the production selection and advisory process.

ADSTAND
The digital customer stopper for showcasing services and much more.

OVER-THE-COUNTER / SELF SERVICE DISPLAY
Active marketing space: Put yourself, your services and your products in the limelight. And optimise processes through digital visual selection.

VIDEO WALL
Large video and panoramic contents across several screens create a shopping atmosphere or turn into digital posters in no time at all.

CONSULTING DESK DISPLAY
The quality of the advice is controlled by a touch screen improved directly in the HV area and visually accompanies the conversation.

EMERGENCY SERVICE DISPLAY
Always up to date thanks to a direct interface to your pharmacy association.

ADVICE
Information terminal with automatic translation function (languages freely configurable).

DIGITAL BUTLER
Contactless entry system for stress-free and secure access control in your pharmacy.

24/7 TERMINAL
Regardless of your opening hours: our 24/7 terminal gives your customers access to you even outside of your usual hours.*

WINDOW DISPLAY
Moving images turn heads – even outside of your regular opening hours.

* The possible use of the terminal depends on the respective legal conditions of the countries.
