APOSTORE

Equipment	dash!
	Easy Use GUI with intuitive operation
	Touch optimised
	Messaging central unit for signals, warnings and faults
	Quick link function for fast detailed views
	Real-time order overview
	User management with badge registration
	Optimised emergency operating mode
	Proactive expiration date control-check
	Storage key indicators (storage depth, storage time, allocation, ...)
	Lot tracking and dispensing
	Extended data export functions
	Complete package tracking
	Verifier including iScan 3.0 integration
	Reading of data matrix including SecurPharm preparation

The newest graphic user interface, dash!, analyzes and evaluates all details of an Apostore automatic dispenser. Product storage and dispensing is managed, the storage deposit checked and important statistics about incoming and outgoing goods are easily displayed on the touch screen monitors.

To avoid unnecessary delays and enhance the user-friendliness, dash! offers a badge-scan option as opposed to traditional password entry. The self-explanatory emergency operating mode of the dash! interface circumvents mistakes during times of chaos through a step-by-step system shut-down mode. dash! and the Apostore iScan is the perfect pair to operationally optimize your pharmacy.
