**APOSTORE**

Equipment	iScan 3.0
Function scope	1D barcodes (pharma central number) 2D barcodes (data matrix) OCR character reading (expiration date, charge number)
Character reading rate	97% (low)
Throughput (article/h)	500
Camera	6x GGR7 Ethernet industrial cameras
dash! Integrated	Intuitive user interface Optional user interaction

The new identification system from Apostore enables efficient scanning of NDC and data matrix barcodes as well as imprinted expiration dates and lot numbers: all in a single step.

Six cameras photograph the items from all sides with 97% data capture accuracy including lot numbers, ensuring total regulatory compliance in medication storage. When scanning is not possible, the ergonomically structured error handling function allows the associate to comfortably read labels when manual data entry is required.
